

Software Development

The Web/Windows/Mobile software development services provided by Glitz IT Solutions extent the entire project life cycle, starting from requirement analysis through design, development, testing, integration, delivery and implementation to after-sales support. Our Agile software development process keeps track of all projects thus by ensuring timely and quality delivery.

Software Re-Engineering

A constantly evolving business environment calls for migration of legacy software based systems to new generation systems. Glitz IT Solutions application re-engineering expertise helps organizations leverage the benefits of leading-edge technology platforms and frameworks. These help the client update applications, thus empowering the businesses with greater flexibility, better maintainability and lower cost of ownership. Glitz IT Solutions is capable of carrying out migration of database systems, user interface conversion and also technology upgrades from client-server architecture to PHP or .NET.

Software Maintenance

The Glitz IT Solutions' experience in maintenance projects, range from customization, defect fixing and enhancement requests to suit the changing business needs of organizations. Our comprehensive support and maintenance services ensure customer satisfaction by providing on-time support and value added services.

Offshore Development Services

For clients having large projects, and in which requirements change as per time, this is the best model. ODC is best suitable for custom software development and mission critical projects. We appoint experienced and talented developers who work exclusively on your project to deliver high quality solutions. We only appoint those developers who have already worked on similar type of projects and can efficiently manage complex problems to deliver best possible result.

UI and Website Design

We do User Interface design, Web design, Flash Animation, Branding Identity, Print Design and all kind of Graphic Designs. Our works are excellent due to the extra care and prominence we lay on the User Interface design of our Graphics. We craft our designs with a classiness for the catchy, but we fully keep concentrate in it's real goals. Our difference lies in the whole procedure we practice to fabricate our designs. It's all about magical visual experience to the user. Being part of an IT firm, our Designers are able to work with the varying technological trends. Each project is handled with extreme care and attention. For more details please visit www.glitzgraphix.com.
